Revision C

Revision A: initial consultation summary: October 2023

Revision B: draft concept consultation summary: May/June 2024

Revision C: final concept plan: July 2024

HW Foletta Park – park upgrade

Consultation summary report – Concept Plan Phase 2

July 2024

HW Foletta Park is on the corner of Garden Street/Glenlyon Road in Brunswick and is a very small-sized reserve, currently comprising of a play-space, trees, gravel paths and a small open lawn area. It has been determined ready for a park upgrade according to Merri-bek City Council's Open Space and Playspace strategies.

This report provides a summary of the HW Foletta Park consultation – Phase 1, Ideas Gathering and Phase 2 – consultation on the concept plan.

1. Background

This report covers a summary of each consultation stages for the HW Foletta Park, park upgrade. This phase is Consultation on the Concept' to gauge community response to the concept and amend the design if required in response to the feedback.

As mentioned on Conversations Merri-Bek webpage, the following elements of the reserve are not negotiable as part of this upgrade:

- The upgrade will only cover the reserve and playspace area, not the surrounding areas (e.g. roads, car parking, lighting, services etc) – excepting a new maintenance crossover.
- This park will remain a 'Dog on-leash' Park
- Large-sized play elements cannot be included (e.g. a flying fox, tower combination unit, etc) owing to the lack sufficient space and proximity of neighbouring properties
- Unless trees are dead or in decline, they will not be removed as part of the works
- Existing fencing will remain, however, if any damages are present, they will be repaired
- All the works must fit into the available budget.

Council's Open Space Design and Development unit are conducting three consultation phases with the local community for the HW Foletta Park upgrade, these being:

- **Initial consultation**

Council have asked the local community what they would like to see included in the upgrade of this park. This information can be used as inputs to developing the draft concept plan. This stage has now closed.

- **Draft Concept Plan Consultation**

Using results from the initial consultation, Council has developed a draft concept plan using the local community's initial input.

- **Revised/Final Concept Plan Consultation**

This revised concept plan reflects changes from the draft concept plan, incorporating the community's feedback where possible. After receiving feedback, a final concept plan will be produced including any final changes to the design where possible. This will close the consultation process, prior to the team proceeding to detailed design.

Consultation timings

Initial consultation: 4 September – 6 October 2023 (completed)

Draft concept plan consultation: 28 March – June 2024 (completed)

Revised/final concept plan issued: July 2024.

For both the initial and draft concept plan consultations, postcards are distributed to households within 0.4km of HW Foletta Park, advising residents that they can provide feedback using Council's website, <https://conversations.merri-bek.vic.gov.au/hw-foletta-park>. Posters were also displayed at the park and provided to the adjacent kindergarten and day-care centres.

A similar poster approach will be undertaken for the revised/final concept plan. The final concept plan will be displayed on the website along with posters at site. Thereafter the Open Space Design and Development team can proceed to detailed design. We will advise when construction will be starting and finishing once known.

2. Initial Consultation Feedback Findings

Council received 18 feedback responses to the initial consultation. 17 from the conversations website and 1 from a direct email.

This feedback has been organised into the following categories (not in order):

- **Laws, rubbish collection and dog problems**

Several comments from respondents have noted the issue of unwanted dog activity such as digging, dogs off leash and defecating in the play area. This is something we hope to address through the design, reducing/removing the grassed area and clearer signage in and around the park.

- **Gathering spaces and seating**

Many people asked for additional seating throughout the park, especially in shaded areas and suggested a gathering space and/or shelter to be provided for carers to sit and watch their children play. We agree an improved gathering space area and shelter would greatly benefit users of this reserve.

- **Additional trees and garden beds (shade, buffer and biodiversity/interest)**

Further shade trees were requested as well as garden beds to provide natural barriers adjacent roads and neighbours. We are planning to install a number of garden beds to improve biodiversity and provide interest along with some additional trees.

- **Playspace upgrade (suggested items, nature play, materials)**

Many respondents asked for different forms of play equipment. The majority flagged the need for the play equipment to target the 3 – 10 year olds, owing to the numbers of children from the adjacent kinder and nearby day-care facilities, with some elements for the 2 – 6 year olds in particular.

Will endeavour to source equipment that uses a mixture of materials with less focus on plastics where possible and to provide a range of equipment that suits this range of ages.

The request for an 'all abilities' swing seat has resulted in the proposal for the 360° basket pendulum swing with surfacing beneath to allow for wheelchair access. We have found that this swing provides not only for wheelchair users, but babies, elderly and teenagers equally enjoy it in their own way!

Monkey bars were also requested, and we will endeavour to include them within the main combination play piece.

Several have asked for nature-based play (including logs/rocks and to encourage exploring) to be included in addition to more traditional play equipment.

- **Water play**

Water play was requested. There is insufficient budget to include water play in this small reserve. We can however include nature-based play using different and recycled materials to make the area engaging.

- **Sports related (ball games, fitness equipment)**

A few people asked for some ball sports or fitness equipment. Currently ball sports are not permitted in this reserve owing to the proximity of neighbouring properties.

It is also unlikely that there will be sufficient budget to allow for outdoor fitness equipment as well as new play equipment.

- **Gathering space and Shade sails (seating, shelter, shade sails)**

Several asked for more seating and a shelter. We intend to include a shelter with picnic table beneath along with strategically placed seats and platform benches throughout the park.

Many responses discussed the need for additional shade and in particular shade 'sails'. We are unable to provide shade sails in this reserve owing to budget constraints, however, we intend to include shade as part of the play equipment where possible (in particular, the combination unit) and to see if additional shade components can be incorporated as part of it. HW Foletta Park already has many established trees offering shade (particularly on the north and western boundaries) and we are planning to include additional shade trees as well.

- **Toilets**

A few respondents asked for a toilet. We cannot include a toilet in this upgrade, mainly owing to insufficient budget and lack of physical space.

Inclusion of public toilets in public open space are subject to Council's public toilet policy and not generally part of a small park upgrade. Where they are included, it is where there are insufficient public toilets in the vicinity.

- **Dogs in the park (off-leash / on-leash discussion)**

Several individuals commented on the need to keep the playspace areas protected from dogs and to deal with digging and defecation issues. We will look at ways to discourage dogs from being within the playspace. To adhere to council policy, dogs must not be within 15m of a playspace and in HW Foletta Park, must be always on a leash. We will be adding new signage to both entries to remind park users that dogs must be on leash at all times in the park and cannot be within 15m of the playspace.

HW Foletta Park will remain a dog on-leash park. For a list of dog off-leash parks in the municipality you can view: <https://merri-bek.vic.gov.au/exploring-merri-bek/parks-and-gardens/park-amenities#autoAnchor2>

We will endeavour to address as many of these requirements as possible in the HW Foletta Park Concept design.

3. Draft Concept Plan Consultation Feedback Findings

Four written responses were received from our Conversations Web page consultation. 3 were complimentary of the park design whilst all 4 requested additional elements such as musical equipment, bbq's and toilets. Each of these items were discussed in the FAQ's as not being appropriate or feasible in this location due to proximity to neighbours and budget constraints.

Drop in Session Summary:

16/4/2024 between 1.30 and 4.45pm (Extended due to kinder finishing at 4pm)

3 people came into the park with small dogs between 1.30 – 4 and 20-30 people with kids came in when kinder finished across the road at 4pm. The latter seem to be the main users of the park. Most people were happy and excited about the design.

Grass – most people understood that not having grass would deter dog owners from using the park as a dog run, and that it would be easier for our crews to maintain. 1 lady expressed her disappointment at the loss of grass from the space.

Parents really wanted a toilet at the park, but understood that budget and space were against us. 2 children did a 'bush wee' whilst we were there. I asked why they couldn't use the kinder toilets before they leave and the parent explain that if the kinder is still open, they often do, but that kids metabolism is increased after a 'run around' and so they need to go often about 10 mins after they get to the park. The existing shrubs provide some screening, but it is really quite open for all to see.

More requests for monkey bars, slightly lower for young kids, but for those that are slightly older too. We will endeavour to make sure this is a part of the main play piece or incorporated elsewhere in the park design.

4. Revised/final Concept Plan

Community feedback to the Draft Concept plan was generally positive with requests for minor adjustments such as ensuring 'Monkey bars' were included in the main play piece and that a different spinning element was included instead of the 'pole' style spinna.

The draft concept plan has been amended slightly to accommodate these community wishes with Monkey bars now included in the play piece and a spinning 'Sfera' ball to replace the pole. A backboard and an additional activity board were also incorporated into the Final Landscape Plan. See Appendix 7e for details.

5. Next Steps

The Open Space Design and Development have prepared the revised/final concept plan, using feedback received from the draft and initial consultation stages.

This plan is now on display to the community on posters at site and on council's Conversations Merri-bek webpage. This completes consultation and our team are proceeding to detailed design and construction.

6. Further information

Any questions can be directed to Council's Open Space Design & Development Unit via email openspace@merri-bek.vic.gov.au or by phoning 9240 111.

7. Appendix

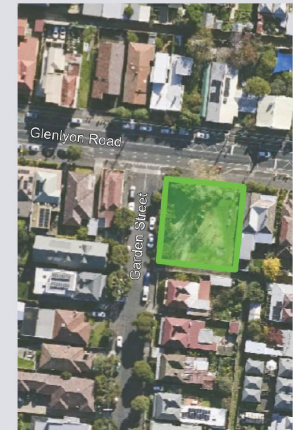

Below are all feedback received from the community for each stage of consultation for the HW Foletta Park upgrade and images of the posters and postcards issued.

7a Initial Consultation

We are upgrading a number of parks in 2023-2024, including HW Foletta Park in Brunswick. These projects are supported through our Open Space Strategy.

What would you like to see included in this upgrade?
Your ideas can help shape our plans.

Figure 1: Postcards were issued to households within 0.4km of the reserve.

Below is feedback received for the HW Foletta Park Phase 1:

Date Submitted	Title	Description
Oct 05, 2023, 07:48 PM	A Park For All Ages	My kids and I have enjoyed the park since they were little...they are big now. We think some exercise equipment would be a great way for all ages to enjoy the space together as a community. More greenery and seating would be appreciated as well...
Oct 02, 2023, 09:51 PM	Space for ball games and upgraded play equipment	My kids have loved coming to this park since they were babies, but it does seem to have gotten a bit run down over the last few years. They would love to see some new play equipment - ideally still things for younger kids given the proximity to the kinder/daycare, but maybe some climbing equipment for bigger kids too? They would also really love some space for ball games, they suggested a small soccer goal, or a basketball ring. A public toilet would also be great! The main issue that we have found with the park is that people tend to use it as a dog park, despite signage that asks dogs to be on leads. There is always a lot of dog poo, and holes from dogs digging. I'm not sure how you could prevent this, but perhaps with more play equipment and less open grass it would seem less like a dog park and people might treat it as such?
Oct 02, 2023, 02:37 PM	More flora	More flora and shade and sitting areas.
Sep 30, 2023, 05:03 PM	Benches	Plenty of benches around the perimeter of the park would allow residents to gather and relax while watching their children use the equipment. Or those benches could provide places to sit and wait until a piece of exercise equipment is available for use.
Sep 30, 2023, 04:41 PM	Drop Shot Basketball Hoop	The Drop Shot Basketball Hoop lets kids hone their ball and reaction skills at the park. Created and designed for kids ages 5 to adult.
Sep 30, 2023, 04:37 PM	All ages and abilities	Chin-up bar, curved balance beam, a jump-touch measuring post, a drop-shot pole, parallel bars, and so on. There are so many pieces of equipment that can be of interest for older residents as well as toddlers and children.
Sep 30, 2023, 04:29 PM	All ages and abilities	The All Abilities swing seat is designed for children with special needs or disabilities. This swing has high back support and a seat belt harness. Perfect for inclusive play spaces.
Sep 30, 2023, 04:25 PM	All ages and abilities	Like previous posters, I think shade cloth would be great, and a water pump is a good idea. One of those all abilities swings might be good, too, or a round netted swing like the one at the playground on Barkly Street. There are also simple options for adult fitness that could perhaps be included in the small space. I've attached a photo of an example.

Sep 28, 2023, 07:51 PM	More suitable for more ages	It would be great to have a water pump and sand pit area. Additionally a larger structure for kids of various ages to run around on. The existing one is great but has a very limited age suitability.
Sep 28, 2023, 04:29 PM	Neighbourly	My family have been visiting the park since my kids went to the nearby Neighbourhood House as well as the kinder across the road. The playground equipment long ago reached its use-by date. Old and boring. I think there's room to put in a new playground (wood, adventure style). I also think there's room for an outdoor gym, the kind you see in many council areas. Chin-up bars, dip bars, etc. It would be great if adults interested in staying fit and active had a small space. Perhaps even a 1/2-court basketball court. Thanks.
Sep 15, 2023, 11:07 AM	Local View	Inform and consult locals properly. This forum is not suitable for detailed or complex discussion. Keep it simple. It is just a pocket park.
Sep 12, 2023, 07:18 AM	Third to support shade requests below	Agree with below 2 requests for council to reverse their policy on shade cloths. The recent Gilpin Park playground disaster is an example of the community lobbying for shade cloth and being completely ignored (just a few new native trees planted which will not provide any shade cover even when they are 30 years old) - now we have a wonderful playground that is literally uninhabitable and empty in summer from about 10am - 4:30pm because you get incinerated by the sun. I can't believe in the skin cancer capital of the world this is even a discussion! Please install shade cloth at this playground then urgently revisit all your recent "upgrades" like Gilpin Park and make them safe for the kids. Thank you.
Sep 09, 2023, 08:45 PM	Improved park at Brunswick for each location	I agree. We have new look Gathering space area with large platform seat and backed seat on gravel paved area in it's improved park was located in HW Foletta Park at Brunswick, plus some BBQ and picnic facilities, Timber carved rocking units, new garden beds and additional trees, bushwalking, upgrade to playspace equipment, Bench seat, Picnic setting, Accessible drinking fountain, new fitness equipment, table tennis, play cricket, play football, play soccer, play gridiron, play rugby league, play rugby union, new and existing playspace equipment, Platform seat, Accessible playspace and its natural scenery to be retained, that would be a great new look park had been improved for it's located in Brunswick from metropolitan Victoria as well.
Sep 07, 2023, 08:04 AM	Second the shade request!	Totally agree with a previous poster who mentioned a shade cloth. I always wondered why there are so many great parks in neighbouring city of Yarra (and indeed all over Australia!) with shade cloths and nowhere in Brunswick seems to have them. Didn't realise it was council policy. That is absolutely ridiculous. This should be a given and the first thing in the list for any new park upgrade. In terms of new play spaces anything nature based is always a big hit, water pump, logs, stuff to climb etc.

Sep 07, 2023, 06:12 AM	Install shade cloth	I know council ignores and refuses requests to install shade cloth at playgrounds because it is 'too hard to maintain' / 'we planted new trees please wait 25 years for them to grow' but this is not acceptable. Other councils do it and in fact have policies that they must install them to be SunSmart, yet our council is happy to let our kids bake in the sun and almost all Brunswick playgrounds are unusable during summer day hours because of this. We don't have large leafy trees like other suburbs for shade - at BEST we have a few native trees that provide poor or limited shade. Please stop this nonsensical policy of not installing shade cloth and correct this now by installing at all new playgrounds and also retrofitting all playgrounds, now. It's your duty of care to Brunswick's kids. Thank you.
Sep 06, 2023, 09:30 PM	Much loved park in need of upgrade	This is our local park and my kids, as well as all of the children from the nearby kinders and daycares, will be so excited to have new play equipment to enjoy. Our kids love climbing, so climbing walls or a rope bridge would be a hit. I would also love to see stepping logs around the park as they look lovely and improve balance and coordination. A see-saw would be a hit, and a (recycled) water pump like Bulleke-Bek would be awesome for warmer weather. The existing trees are quite lovely and provide adequate shade, but a small covered shelter would be useful for rainy or very sunny weather. It would also be brilliant to feature artwork (e.g. a sculpture or mosaic) and language ("Wominjeka") that references the Traditional Wurundjeri Owners and we can use to teach our kids about First Nations history. Agree with the previous submission about the issues with people not cleaning up after their dogs when they defecate. It's extremely disrespectful to the kids who have the right to play freely. Dogs also dig massive holes, which I've seen a number of children fall into. I do understand there's no easy solution for this, but it's such a shame. Hopefully the upgrade will deter those dog owners. We're so excited to see this in action!
Sep 06, 2023, 08:59 PM	Dog owner's use of the park	Most dog owners seem to use the park as a place for their pets to defecate. This negatively impacts the amenity of the park. Grass areas should be improved and made use of for kids play. Clear signage should indicate spaces for kids to play vs dogs. Clear signage and dog bags should be provided to encourage dog owners to pick up after their pets. The kid's equipment, while a bit old, was suitable for the ages of kids using the nearby creche and kindy.

Email from Jeanette and Phillip Meighen (Neighbours to the park):

Hi Wendy,

Here are some thoughts on the upcoming works in Foletta Park. As you can see from our address, we are the adjoining property and have lived here for 31 years, seeing quite a few changes to this pocket park. We are always happy to hear the sound of children using the park and appreciate the little patch of greenery.

We think it would be appropriate for those in the close neighbourhood to be approached personally as we have to live with the long-term consequences as opposed to those who just use it when they have preschool children or those who just use it as a dog toilet.

A few dot points that come to mind.

- Some policing of the current regulations regarding dogs. Nobody is happy with the uncleared excrement and owners rarely keep their dog on it's lease.
- Restoration of the "no ball games" sign. The previous sign didn't seem to deter little kid's games but was some help when pointed out to bigger people. Yes, we have had broken windows in the past.
- Shading of our property taken into account; windows and roof (i.e. site of future panels) kept clear all year.
- No 'artwork'. We remove tagging on our adjoining fence and the one on the lane using our own and Council provided paint.
- Maintain the health and form of the big (poplar?) tree. Branches fall regularly in wind.

These are just some off the cuff thoughts and we would be happy to discuss anything especially we see your proposal.

Regards,

Jeanette & Phillip Meighen

7b Draft Concept Plan Consultation

Figure 2: Postcards were issued to households within 0.4km of the park.

7c Draft Concept Plan and Park Element Images:

This park upgrade concept has inclusive play elements, recycled materials, additional seating (formal and informal), nature play, trees and a new shelter for more shade and a variety of new play equipment with inbuilt shade.

Proposed Park Upgrades Include:

1. New double swing set with Parent/toddler swing
2. New multi-play, platform structure with in-built roofs for shade, monkey bars, slides, bridge between platforms, activity panels and rope climbing.
3. Spinna
4. Spring rocker
5. New 6 x 4 Shelter for permanent shade with picnic table.
6. Small rock and log informal 'table and seats'.
7. Junior play cubby house.
8. Existing drink fountain re-positioned for better access.
9. Rubbish bins
10. Nature play rock, log and tyre steppers and pavers.
11. Fairy ring
12. New park signage
13. Timber animal sculptures.
14. Gravel path surface to picnic table and seating.
15. 360 degree pendulum basket swing.
16. Graded concrete path threshold treatments into the park.
17. New maintenance vehicle access gate and new crossover to kerb.
18. Compacted/cement stabilised granitic gravel path.
19. Screen planting along eastern boundary with shrubs no taller than the fence with 5 small trees/large shrubs max. 4-5m tall.

General:

New fence panels will replace any missing or damaged sections. Old furniture will be removed and new furniture installed throughout the park.

Please note that images representing play equipment are indicative only and subject to change.

7d Draft Concept Plan Consultation Responses

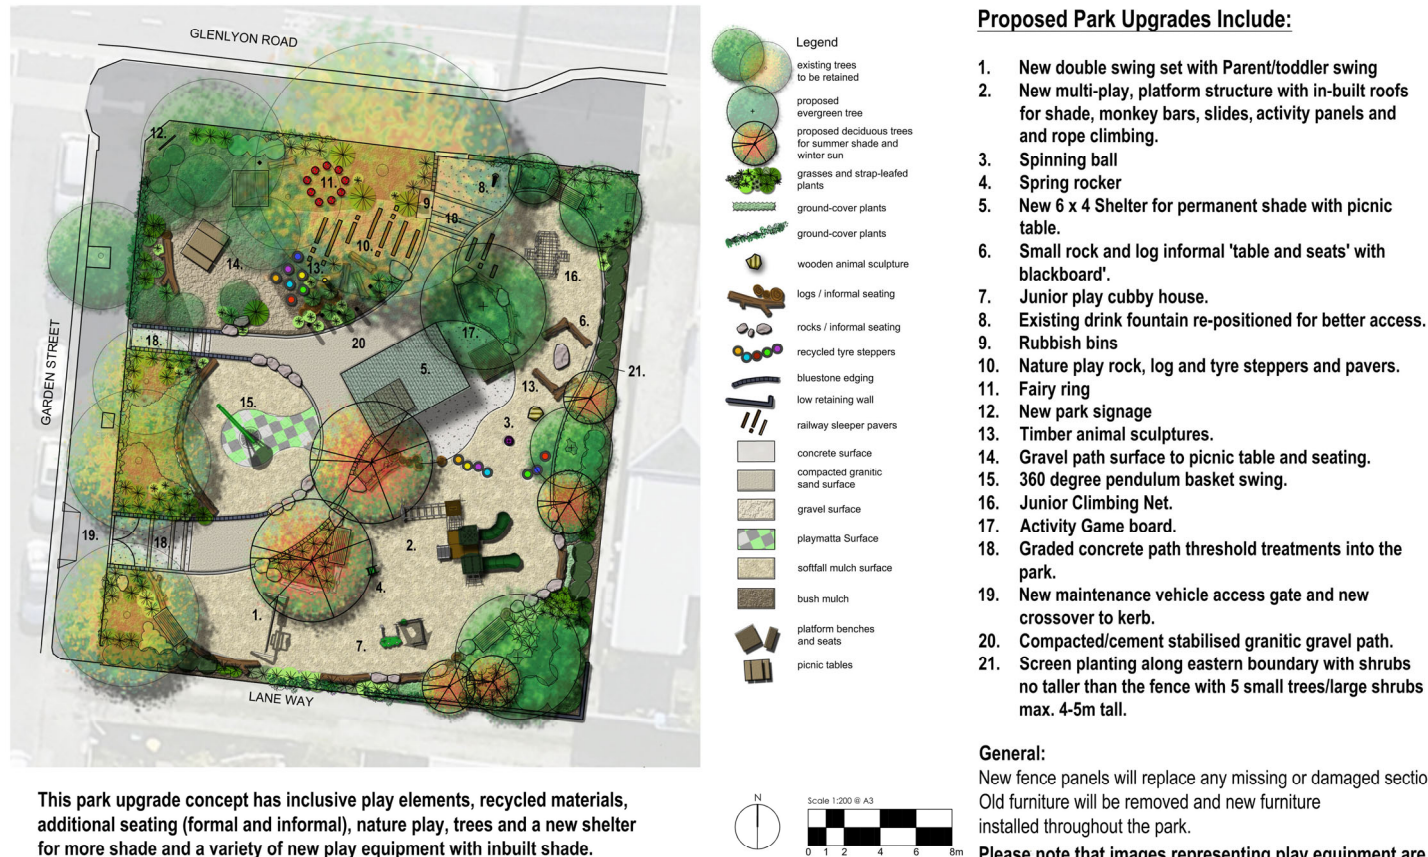

Below is feedback received for HW Foletta Park during the Draft Concept Plan consultation – Phase 2:

Date Submitted	Title	Description
Apr 07, 2024, 10:25 AM	Sound sensory play	Can we get some tubular bells / pipes type installation that kids can play that actually sound beautiful and resonant? It encourages musical listening, creates a nice atmosphere for other park goers (if they're designed well), and is a special participatory activity that adults and kids can engage in together. It might help bring a more friendly sound space than the relatively heavy traffic as well - they're very meditative. A brilliant example at Woodend Children's park, photo attached. Happy to put you in touch with local residents who can make / design one.
Apr 06, 2024, 09:22 PM	A great starting point	Really like the look of the design, which seems to use the space much better than it's currently used. I'd suggest removing the Spinna (kids rarely use them and they seem a waste) and adding in more basic swings as they are always in high demand (including toddler swings). Depending on the budget, it would also be great to have a bbq and toilet.
Apr 06, 2024, 03:07 PM	Missed opportunity?	This looks great and a dramatic upgrade on the current state of the park. The location of the park is so accessible, with the creche and kinder nearby there's a missed opportunity to add a bbq to the picnic area.
Mar 31, 2024, 10:14 PM	An improvement	Design looks rather good and a needed update, would possibly suggest deciduous trees as opposed to the proposed evergreen trees, just to ensure that enough sun is available in the park in winter and sufficient shade in summer

Feedback from the drop-in session has been summarised on page 5 of this document.

7e Revised/final Concept Plan and final design elements

Below shows the revised / final concept plan. This is also displayed at the reserve and on HW Foletta Park Conversations Merri-bek webpage.

This park upgrade concept has inclusive play elements, recycled materials, additional seating (formal and informal), nature play, trees and a new shelter for more shade and a variety of new play equipment with inbuilt shade.

For more information please visit our website: conversations.merri-bek.vic.gov.au/hw-foletta-park
