

CLIFTON PARK
Replacement basketball
court

Council will be replacing the original half basketball court with an upgraded court and amenities near the events pavilion in Clifton Park.

We are currently undertaking detailed design and procurement. Once complete we'll advise when in 2025 this new court will be constructed and re-opened to the public.

The original court had to be removed to allow for the developer works adjacent on Albert Street to complete their public works.

You can review this plan on: <https://conversations.merri-bek.vic.gov.au/clifton-park-upgrade>

Seating area with platform seat.
Possible additional drinking fountain (if
budget allows)

Additional native trees to provide shade
and a buffer around court

New half basketball court with noise reduction
backboard and metal chain goal post. Surfacing either in
concrete or noise reduction court surfacing

New concrete path connecting
to seating and court through existing
low brick wall opening
