September 2025

Revision A

Revision A: initial consultation summary: September 2025

ATC Cook Reserve – park upgrade

Consultation summary report

September 2025

ATC Cook Reserve is a medium-sized reserve including a small playspace, gathering spaces with a shelter, fitness equipment, car parks and an oval with a circular gravel track. There is existing seating, established trees, garden beds and open lawn areas.

It has been assessed to be ready for a park upgrade according to Merri-bek City Council's Open Space and Playspace strategies.

This report provides a summary of the ATC Cook Reserve consultation for this park.

1. Background

This report covers a summary of each consultation stage for the ATC Cook Reserve park upgrade.

As mentioned on Conversations Merri-Bek webpage, the following elements of the reserve are not negotiable as part of this upgrade:

- The location of the playspace will need to be determined by Council.
- Very large play elements (like flying foxes) cannot be included in the playspace as there is limited room.
- Final park infrastructure upgrades will be determined by Council.
- Active sports elements (like sports fields, pavilions, changing rooms etc) cannot be included in this upgrade.
- No trees will be removed as part of this upgrade unless trees are found to be dead or in decline.
- This upgrade will only cover the reserve area, not the surrounding streets.
- The final concept design must fit within the available budget.

Council's Open Space Design and Development unit have conducted one consultation phase to date with the local community near ATC Cook Reserve, these consultation stages are:

- **Initial consultation**

Council have asked the local community what they would like to see included in the upgrade of this park. This information can be used as input to develop the draft concept plan. This stage has now closed.

- **Draft Concept Plan Consultation**

Using results from the initial consultation, Council will develop a draft concept plan using the local community's initial input.

- **Final Concept Plan Consultation**

This final concept plan will reflect any modifications to the draft concept plan, incorporating the community's feedback where possible. This final concept plan will close the consultation process, prior to the team proceeding to detailed design.

Consultation timings

Initial consultation: 11 August – 6 September 2025 (completed)

Draft concept plan consultation: September 2025 (dates to be confirmed)

Final concept plan issued: October 2025 (dates to be confirmed).

For both the initial and draft concept plan consultations, postcards are distributed to households within 0.5km of ATC Cook Reserve, advising residents that they can provide feedback using Council's website, <https://conversations.merri-bek.vic.gov.au/atc-cook-reserve-glenroy>. Posters advertising the consultation stage are also displayed near the playspace.

Once consultation completes, the Open Space Design and Development team will proceed to detailed design and then procurement. We will advise further when construction will be starting and finishing, once we know.

2. Initial Consultation Feedback Findings

Council received 27 feedback responses to the initial consultation, each with a number of suggestions. This feedback has been organised into the following categories (not in order):

- **Anti-social behaviour**

This has been noted occurring especially in the car park and near Heather Court by various respondents.

As a separate initiative, Council will be installing wheel stops and tree cut-outs with barriers in car park bays to reduce hooning in the car park. We are also looking to include lighting in the car park, if funds allow. This project will be actioned by our Transport team. Details of proposed works is shown on the Conversations webpage.

We will also be looking at improving the end of Heather Court where it meets the reserve to reduce anti-social behaviour occurring there.

We will be looking at other methods for addressing anti-social behaviour including drug taking and illegal motorbike riding through the reserve, through this design.

It is unlikely at this stage we will be installing CCTV in the reserve as we are focusing the budget on the park infrastructure that we can improve overall. We have found in the past that CCTV provides limited benefits, especially if there is insufficient lighting (which we are also looking to address).

We will follow up with the relevant teams if the maintenance gate can be locked at night to reduce hoon behaviour.

- **Accessibility and Safety**

Many have asked for accessible paths to connect various areas of the reserve and to address the uneven gravel path around the oval.

We are planning to replace the existing circular gravel path around the oval with a concrete path to make the reserve more accessible, including linking the rear of Glenroy Specialist School with the reserve, as they currently cannot enter it directly. We have noted that the gravel path is in particularly poor condition along the southern end.

- **Barrier treatments (fencing and gates)**

A few have asked for fencing to protect children in the playspace and protect the park from illegal vehicle entry. As part of the playspace upgrade we will look at improving barrier treatments near Daley Street. Improved barrier treatments are also needed between the car park and along the eastern side of the reserve.

We will look at whether some barrier treatment around the oval can be included though this has to be considered in consultation with our Recreation team and with the sporting clubs.

- **Bins and Rubbish Collection**

Many respondents have commented on litter dumping (including glass and syringes) in the reserve and asked for an increase in litter collection generally. Some reserve areas seem to be targeted more for dumping than others, such as over the fence between Ballerit Mooroop & ATC Reserve and in the car park near Ash Court.

Some have asked for additional bins. This will need to be carefully considered as it might exacerbate litter dumping in the park, rather than improving the situation. We are planning to reposition many of the waste bins to better locations.

- **Lighting**

Some local residents mentioned how some areas in the reserve feel unsafe at night and in the winter months, especially in the car park in Ash Court. We are looking into including lighting in the car park if funds allow. At this stage we are not sure that there will be sufficient funds to cover lighting around the reserve.

- **Playspace shade**

Several respondents have asked for shade cover in the playspace. We will assess if a shade sail can be included to cover junior play. There are also existing trees adjacent which offer some shade and we can look at including additional shade trees.

- **Gathering space and seating near playspace**

A few have commented on how the BBQ and bins are too close to the playspace and that there is inadequate seating near the playspace.

We will be addressing both the gathering space and playspace, with the intention of moving the BBQ, bins and picnic areas further away from the playspace, to allow for the playspace to be enlarged. Seating can also be reorientated near the playspace with some additional seating.

We would not be including another shelter near the gathering space as Council already provided a new shelter two years ago across from the basketball court.

- **Playspace equipment**

A few respondents have commented on how the existing playspace is tired and offers little to younger children, especially those under 3 years old.

We are planning to upgrade the whole playspace with new equipment, providing for both younger and older children, as much as space and budget allows.

One respondent asked for a sand pit which we can consider and a four-unit swing set. We will look for a range of products that maximise play value and fit into the space.

Another respondent asked for inclusive play equipment. We are looking at including a few inclusive play items, also to encourage Glenroy Specialist School students to use the playspace. This will need to be as space allows, since the playspace footprint in ATC Cook Reserve is not very large.

- **Water play**

A few respondents have asked for water play to be included in the playspace.

Unfortunately, there is not sufficient space or budget to include water play in this reserve. We will however look at other sensory play items with which to engage children.

- **Fenced dog park**

A few respondents asked for a fenced dog area. We will not be providing a fenced dog park in ATC Cook Reserve and ask that dog owners manage their dogs in line with this park's dog policy. There are already four new fenced dog parks in the north: one at Sewell Reserve in Glenroy, Moomba Park in Fawkner, Kingsford Smith-Ulm in Glenroy and in Gowanbrae, in addition to other existing fenced dog parks in the municipality.

For a list of our dog off-leash and dog parks are located, you can view:

<https://www.merri-bek.vic.gov.au/exploring-merri-bek/parks-and-gardens/park-amenities/>

- **Basketball court improvements / futsal soccer pitch / rebound wall**

A few respondents have advised that the basketball court is in poor condition. We will assess the court's condition to see if small improvements can be made to the existing half court. It is not possible to increase it to a full basketball court as likely insufficient space.

The rebound wall or futsal are interesting ideas, if a suitable location in the reserve can be identified. We are considering activation of the south west corner of the car park following the car park improvement works.

- **Public toilet**

Unfortunately, we are not able to address the public toilet as part of this upgrade. Please report any issues with its working order as soon as you identify it so they can be actioned promptly.

We will endeavour to address as many of these requirements as possible in the ATC Cook Reserve draft concept design.

3. Draft Concept Plan Consultation Feedback Findings

A summary of feedback responses will be added here once this stage has been reached.

4. Final Concept Plan

A summary of feedback responses will be added here once this stage has been reached.

5. Next Steps

The Open Space Design and Development team have completed the initial consultation stage and will be developing a draft concept plan to present to the local community. This will be advertised using posters in the reserve and using postcards distributed within 0.5km of the reserve. Both of these will include a link to the Conversations webpage where local residents can provide their feedback on the plan.

6. Further information

Any questions can be directed to Council's Open Space Design & Development Unit via email openspace@merri-bek.vic.gov.au or by phoning 9240 111.

7. Appendix

Below is all feedback received from the community for each stage of consultation for the ATC Cook Reserve and images of the postcards and posters issued.

7a Initial Consultation

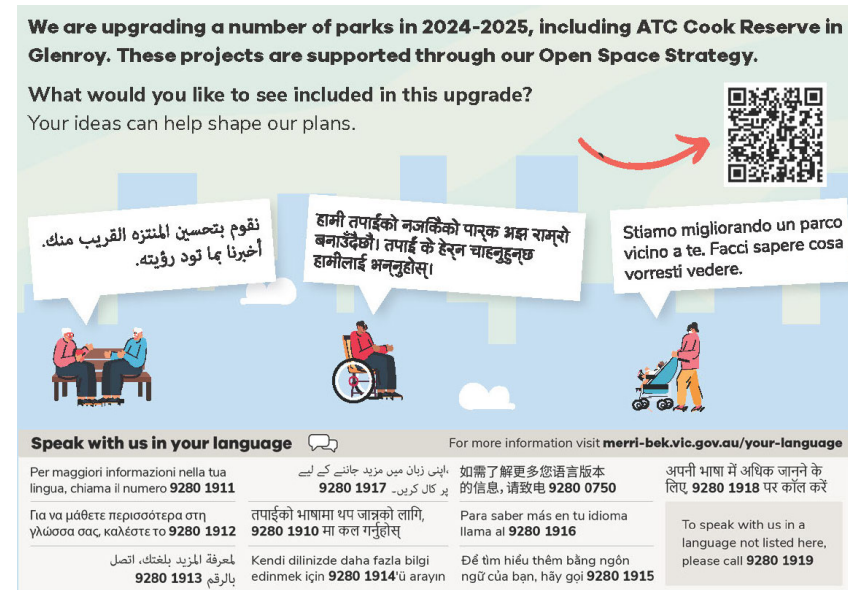

Figure 1: Postcards were issued to households within 0.5km of the reserve.

Below is feedback received for the ATC Cook Reserve initial consultation:

Date Submitted	Screen Name	Description
03/09/25	Wurundjeri Corp	The Wurundjeri Corporation currently leases the Ballertr Mooroop site from Merri-bek City Council. Ballertr Mooroop shares its northern boundary with the most southern part of ATC Cook Reserve, closest to the cricket club rotunda & Ash Court carpark. We are excited by council's announcement to upgrade ATC Cook Reserve. We support key requests from community around accessibility & safety: 1. Additional bins & regular rubbish collection - rubbish is constantly dumped over the fence between Ballertr Mooroop & ATC Reserve. 2. Permanent lighting around the park & Ash Court carpark - keep community safe & comfortable, particularly in dark Winter months. 3. Regenerative horticulture - support native flora and fauna. 4. Walkable pathways - enhance user experience, connect various elements of the precinct. 5. New fencing/ gates – protect park from vehicles/ hooning, create dog friendly zones & encourage mixed oval usage. 6. New shades & upgrades to playground - accessible for all abilities & host large families with increased seating. We have witnessed the antisocial behaviour in the Ash Court carpark - a major concern of ours. We welcome initiatives to make the precinct safer and more comfortable for its diverse & multigenerational users. Overall, the community submissions form a strong action plan for council to enhance site usability. Ballertr Mooroop, Will Will Rook, Glenroy Specialist School, the Nepalese community's shed, sporting teams and community members enjoying the area all make this space an inclusive cultural, educational and wellbeing precinct to be celebrated as a gem of Melbourne's northwest. We want the precinct to attract more families & be a place for everyone to enjoy. As we continue to activate Ballertr Mooroop, people will move between our site & the park, so it's important the whole area feels connected, accessible & safe. With the right upgrades, this can be a truly inclusive space that supports community, education and wellbeing.
27/08/25	Zeina	Please provide more equipment. Please provide more shade. A sandpit will be great. Instead of two swings, please provide four swings. Please provide a gate all around the park, so children can't run on the roads. Thank you.
27/08/25	TI	A beautiful park for kids to play and be happy. Greenery is important to glenroy.
25/08/25	CleanGreen	We would like to see a secured dog park for good dogs where pets can play safely, improved lighting at night for walkers and families, and regular daily rubbish collection to keep the park clean. Additionally, stronger barriers could be installed to prevent vehicles from entering the park and causing damage.
23/08/25	Resident	Adding lights that turn on at night is a very good idea. Also improving the basketball court is a good idea and probably adding a futsal soccer pitch.
23/08/25	Gavin	I walk my dog here regularly during the summer months but it gets too dark too early in winter so I'd like to see better permanent lighting installed. This would also make the area a lot safer at night. I would also like to see the walking track upgraded. It could definitely be widened in areas and a proper level surface would help walkers/runners/bike riders. Please don't concrete it though. Keep it as gravel/dirt or install proper running surface.
22/08/25	Amystar	I'm tired of the litter dumping and vandalism that happens at this park. I'm a local and walk my dog there frequently. It's a got a great community atmosphere but it's not very well maintained. Recommend an enclosed fence around the perimeter of the footy/cricket oval. This would stop the vandalism and protect the grassed area. It also provides a dedicated space for sporting

Date Submitted	Screen Name	Description
		activities. It would also provide a dedicated space for dogs to be off lead at certain times. Recommend that during sporting events, no dogs are allowed on the field. When there's no sporting events, then dogs can be contained within the perimeter but have the space and freedom to run around. Refer to Citizens Park in Richmond for how they are managing this same recommendation in reality. For those members of the community who aren't as fond of dogs, it also separates the spaces leaving everyone comfortable. Have a dedicated paved/concrete path around the perimeter. Finally, more frequent rubbish collection in all areas of the park is needed.
21/08/25	CThom	As a family with young children who live walking distance from ATC we would love to see the space improved. A playground with inclusive equipment for all ages and abilities with a fence to allow those with dogs to still use the surrounding areas safely. Better deterrents for erratic driving in the area and appropriate ongoing maintenance is a must. It would also be great to see a paved track around the oval to allow this to be a walking path suitable for prams. So much potential!
21/08/25	Ally	Make a good walking pathway so that kids also ride bikes without any hurdle. Add new equipment in kids playing area also build fence around park or around playing area for kids. Also don't allow dogs inside playing area boundary (Other than playing area it's fine). Focus on rubbish all around park everyone should take responsibility to make park clean.
20/08/25	Tom	- Upgraded playground (i.e. equipment, shade, fence) - Improved basketball court - Off-leash dog area and poo bag supply - Upgraded toilet facilities - Improved safety of carpark (i.e. CCTV cameras, locked gate at night, bollards) - Addition of lights to park - More garbage bins and less dumping of food/waste - Widen path around oval - Re-development of shops on Widford Street (i.e. fish and chips)
20/08/25	Emily	As a local family with a small child and not much outdoor space at our house, we would love to see some attention given to ATC Cook Reserve. We would visit so much more often! A few thoughts: - increase the size of the basketball half-court, and build a rebound wall behind the net with a slab on the other side to be used for solo-tennis, kicking a ball, etc. - Build an enclosed fence with gate around the playground area - this will help to keep children in, and off-leash dogs out (not sure whether off-leash dogs are even allowed, but the fact is they are often present). It would also be great to fence the oval, to keep motorbikes and quadbikes from doing donuts on the grass. - Some more bins around seating areas and placed around the oval may help to reduce rubbish that is a big issue right now. - The area nearest to the Ballert Mooroop site could be better used. Currently it is just patches of scrappy grass and walking track, and some sad looking small trees. A feature to encourage use of this area could be good - an additional small play area, gazebo/gathering space, sport/activity zone could bring a bit more life to this end of the park. - As many others have said, I would use the park far more if there was less dumped rubbish, sharps, and burnouts, and a few more safety features. Currently the space can feel intimidating and unsafe, particularly with a small child.
18/08/25	A	The park would benefit from a strong gate to ensure children can play safely and prevent them from accessing the road. Additional seating would provide a comfortable space for families and friends to relax and enjoy the park. Installing lights around the oval would improve safety at night and allow for extended use of the area. A proper walking track would encourage walking, jogging, and running in a safe and accessible environment. Reducing rubbish and maintaining cleanliness would enhance the overall appearance and usability of the park.

Date Submitted	Screen Name	Description
18/08/25	EKG	ATC Cook is our go-to park and playground for my 5 & 2 year old kids. We live a few hundred metres away yet I'm always hesitant to go there because of the obvious illegal activity, the broken glass, rubbish and drug use and paraphernalia. I once took my kids there and removed a used syringe and glass from the playground. It was horrible. The blatant drug use at the end of Heather Court and in the Ash Ct carpark is very disturbing. Users don't seem to care there are kids there, riding their bikes or people using the bottle return machine. The park needs enough wow factor to attract plenty of sports teams and families so it becomes uncomfortable for the undesirables to continue using it as an anonymous dump / crack den. So how do you change the crowd it attracts? Here's a story of a citizen who took this same problem into their own hands- https://en.m.wikipedia.org/wiki/Oakland_Buddha Not to suggest this needs to be exactly replicated but it's food for thinking outside the box.
18/08/25	Wesy Web	Car parks, infrastructure for prevention of hooning. What is there now isn't effective, it needs to be spaced throughout the carpark. Metal bollards or rocks would be suitable. It can't be so open. Please close the gate at night time as it's a drug/criminal activity hot spot. The playground needs replacing, it's very dated and very hot in summer as it's in full sun. Shade sails and water features would vastly improve it and essential to increased usage. But it needs to be all ages. Currently children under 3 have limited used due to its features. Oval/area needs more suitable fencing around it and more seating for watching matches. When it was used for footy training and cricket matches it was well loved, the gates need to be motor bike restrictive as all entry to the park is, it's common for the grounds to be used in a destructive manner. The basketball court is horrible, mostly broken glass and small size. BBQ area is not suitable; roofing and seating improvements would boost community use. As would bin removal, and CCTV to prevent dumping, which occurs from businesses and households daily. Daly St carparks result in cars parked over footpath to fit, these parks and at shops on Widford street should be horizontal. Widford Daly St roundabout is obscured from view for pedestrians crossing, and a zebra crossing and speed limitation infrastructure needs to be in place for safety. Food truck events would be great and shown successfully already. We have seen improvements and welcome them, but the park is dangerous at times, having safety/emergency contact points like present at university campuses may assist but CCTV to back up to reside misuse. Overall, poor community actions at the park can be prevented with infrastructure and we want the park to be a safe place for all. New plant beds and a space for a communal productive garden would be ideal. Some new plantings are poorly managed and often dead within a season or stolen. Additional animal shelters
17/08/25	Renstar	I run here often around the track and would love for it to be better maintained - there are a few dips that could be filled when the track changes from dirt to join with the southern footpath. I often notice dumped rubbish here and would like it to be removed. I love the birds that hang around here and we could help them by planting some more mid-sized shrubs to encourage other struggling species of bird. It would be nice to do some log edges and larger rocks to provide other habitats for lizards etc. The playground could benefit from some upgrading as well as some shelter e.g. shade cloth for summer. Adding some lighting to help the community able to use the space better in winter months would be lovely too. Would love some nature play options around the playground too since there is the space and already some native plants and ground cover around. Would love for the user experience/walkability of the whole block to better work with the park e.g. connectivity to the bowls club and Glenroy Star Restaurant and the tennis courts.

Date Submitted	Screen Name	Description
		Potentially consider also including a track for bikes/scooters that link from the car park and provides play options e.g. continuous circuit/pump track. I would like the outer circuit path or remain gravel or dirt and not be concreted over as it's easier on the knees and ankles, and doesn't remove natural habitats or need sweeping etc.
17/08/25	Kiran	This park—particularly the northern section—is frequently used by Culturally and Linguistically Diverse (CALD) communities. It would be beneficial to have a larger area (near to shade) designated for gatherings and community functions. Additionally, the play area and toilet facilities require upgrades. Enhancing the BBQ area would also be advantageous.
14/08/25	KP	This is one of our closest parks, and the only one with an oval. I used to come here a lot but unfortunately because it is always so dirty (broken glass pipes, bottles, computers) it's just not a nice place to be. The playground really needs a refresh and renew. There's also a distinct lack of shade both near the playground and round the oval
14/08/25	AdClark1984	This is the closest park for my family with two young children (4 and 1) to our house. Whilst my children like using the playground, it is very outdated, uninspiring, unsafe, and lacking suitability for multiple ages. There are no safe or visually appealing areas within walking distance to our house for our children or family to enjoy in Glenroy. It requires a new and expanded/enlarged playground area for children along with an appropriate shade sail for use during the summer months. The public toilet is often putrid and vandalised, or out of order. There are often youths riding motocross bikes on or around the field, and people using the field as an access point/escape route after committing crimes. There is an unacceptable amount of rubbish constantly around the playground area, including dumped hard rubbish, vapes and alcohol containers. It feels very unsafe to be there as soon as the evening time arrives, with people using the carpark or park surrounds for drug dealing. CCTV cameras and floodlights should be installed to deter these negative elements. A new and redeveloped park and playground space in this location could be the first step to promoting a shift in attitudes and respect for this part of Glenroy and commence the facelift this pocket of the suburb needs.
14/08/25	BS	The carpark is full of hoons nearly every other nights. I know this cause I live in Ash Court. The carpark is full of drug users. I know this cause I walk across to get to Jacana station and I see used Nitrogen cannister, broken beer bottles and cars with open windows and strong smell of weed (and they drive shortly after smoking weed). It doesn't feel safe for women. I know this cause my wife gets catcalled when walking home across it. It gets pitch black dark near the playground area that I have to turn on my flashlight to avoid stepping on puddles. Imagine what it's like for a woman to walk there alone at night. There is an opening on the curb near the cricket cage to allow bicycles, prams or wheelchairs but the ""Keep Clear"" sign is faded so cars are always parked there. Suggestion is to install curb islands to organise the parking, so that it no longer becomes an open flat surface for the hoons. URL to Video: https://youtube.com/shorts/moFclPq4ZwY?si=rbO4s3lesqYt3Gph
14/08/25	Rg	It's next to my home. I want it to be a safe, accessible and hangout area for all ages of family. We need to work on basketball court as well. The play area needs to have more interactive and sensory based with lots of colours for youngsters. The parking of Atc cook around moss court has to ban all the late nights thrifting and hooligans meet-ups. The aboriginal park needs to be

Date Submitted	Screen Name	Description
		treated with respect rather than a dumping zone and need to have more value to reflect in locals. BBQ needs to be functional. If we can have some cycle friendly tracks to teach young ones, that would be great.
13/08/25	McIntyre	Hi, we're a local family living across the road from ATC reserve on Widford St. We have two boys - a two year old son and a baby who loves being outside and roaming the park. We've noticed a lot of rubbish including vape pens, dangerous items such as discarded glass bottles and just things like a broken car tyre lying around so as you can imagine we don't like the baby crawling around too much in the park which is unfortunate. We also would love to see an upgrade in the playground's play equipment. The slide especially is old and quite unsafe. We would love to see some better quality and upgraded play equipment in the park, along with less rubbish and perhaps more encouragement to avoid littering.
12/08/25	Sanjay	ATC Cook Ground has been a wonderful place for me and my family. However, I have noticed some safety concerns, particularly around the cul-de-sac on Mitchell Court and Ash Court. Installing additional street lighting, and possibly CCTV cameras, would be a valuable improvement. As someone from a Nepalese background, this place holds special significance for my family—especially my parents, who meet daily with other community members and spend their mornings and afternoons here. My parents often mention how much they appreciate the shed built by the council, which has been a great addition. That said, there is still room for enhancement. During rainy or windy weather, the space could be more comfortable if the council were able to install a fence around the shed, at least one metre in height, and extend the roof with a shroud looks great. Additionally, upgrading the drainage around, playground equipment, improving the toilets, and making the area more weather-friendly would greatly benefit the community.
12/08/25	Alexandra Taylor	The car park on the Widford Street side of the park has regular hooning and burnouts occurring. It's completely unsafe and makes going to the park awful from the noise and pollution from the smoke from the tires. Cameras and concrete parking dividers to prevent them using it as a race track.
12/08/25	JessicaH	I have a young family and we visit ATC Cook Reserve often. The area is great and has so much potential! It could be such a great space and a place of pride for the Glenroy community but it needs some love. Things that would make it a great space: -Playground upgrade and making it all abilities. With Glenroy Specialist School right next door, it seems a no brainer to include equipment for all to enjoy. The closest all abilities park is Bundoora/Mill Park/Craigieburn. The school being next door, seems a good spot. -Sealed path from School and circuit around the oval for accessibility of wheelchairs/walking aids etc. -Bathroom upgrade - more toilets and better facilities -Fenced playground - given the speed of cars at times on Daley street, seems a no brainer. There is a fence there now but a completely closed one with latches to lock gates is ideal. It's a simple and safe feature. Gives parents piece of mind and a bit more time to chase after a small child on the loose. This area has so much potential with the tennis club, bowls club, Nepalese community shelter, Ballerit Mooroop cultural site and Will Rook Preschool. Having a nicer space will invite more people to enjoy the area and have some pride in the space. Outdoor space is vital as is sport and a healthy community using all the facilities that are there. Investing and improving the useability of facilities is going to have only positive benefits in the community. The council needs to invest in its people in a positive way, this is a great way.

Date Submitted	Screen Name	Description
12/08/25	Bert	Finally this playground is getting a makeover! My family frequently use ACT Cook Reserve. The rubbish in this area is and has always been absolutely shocking. It's embarrassing to bring friends to the area. There is an issue with people parking and drug taking/dealing at the end of Heather Court and in the carpark at the end of Ash Court- it's blatant if you spend time in this area. Enticing more families/sport activities to the area would help reduce this activity. Regarding the playground area it would be amazing to have a water park. An area for entertaining (to attract birthday parties etc) would be ideal. Bins absolutely must be placed right next to areas where food will be consumed (tables) as made evident by the playground at Cardinal Reserve. Please consider shelter over the facilities so children aren't getting sunburned. Considering the amount of dumped rubbish and antisocial behaviour it seems more cameras/fencing should be considered. Bins by the cricket area are also important and perhaps signs in various languages encouraging people to use the bins. Planter boxes would also be welcomed.
11/08/25	Remy	Many people (myself included) use the park to exercise their dogs daily. It would be wonderful to have a fenced area for dogs to socialise in and play off lead (similar to Richards Reserve off leash in Coburg and others around Merri-Bek). There's adequate space under the trees between the basketball court and the football oval on the northwestern side (screenshot attached). This could incorporate some rocks/logs for the dogs to play on and provides enough of a run for ball chasing and socialising with other dogs.
11/08/25	Rabina	This reserve is accessed by large number of children on the north side of Glenroy. It would be great if it had more larger and newer facilities for children to enjoy. The basketball court is horrid. Need to upgrade it. Fencing close to the road needs to be better to ensure safety. Equipment is outdated. Water foundation/ water play for summer would be great for kids in the neighbourhood. BBQ needs updating including horrible small garbage bins. If only bins were more, that side of the area would be cleaner. But more of landscaping would go a long way. Just want our children to access cleaner, nicer and safe playground. Also, if dog's poo bag be available for people who bring for a dog walk would be great.

7b Draft Concept Plan Consultation

Details of the draft concept plan consultation and feedback will be added here when this consultation stage is reached.

7c Final Concept Plan

Details of the final concept plan consultation and feedback will be added here when this consultation stage is reached.
